

A large colony of shorebirds, likely sandpipers, is gathered on a rocky beach. The birds have brown upperparts and white underparts, with some showing a dark band across the eye. They are standing on dark, wet rocks. In the foreground, there are clumps of green grass. The background shows more birds extending towards the water.

FROM THE PRESIDENT'S DESK

I love Audubon camp. Today is the last day for kids and counselors after eight weeks of day camp at McLane Center's *Friends of the Eagle Camp* and Massabesic Center's *Camp Wildside*.

Campers learned about predators, water cycles, pollinators, trees and plants, dirt, and everything in between. Our Centers seem to come alive during camp, humming with the sounds of children having fun and exploring nature.

At camp, we are initiating a life-long connection to nature. How do I know? Most of our counselors were campers. This year, all of our teen *Leaders in Training* were campers. Many parents tell us that their kids can't wait to return. And we will see many of our campers back for Vacation Camps in February and April when school is out for the week.

I believe that nothing is more important than the work we do to positively influence how people think about, make decisions about, and connect to nature. If we do our jobs right, those we

inspire will help us achieve our mission to protect the wildlife and habitats of New Hampshire. I can't think of anything more effective than opening eyes – of all ages – to the wonder of our natural environments.

As fall migration season gets underway, we will be connecting people to nature through birding trips across the state, raptor art activities, and talking with legislators about climate change. Every little bit helps change minds and hearts.

I invite you to let us know how you connect to nature. And I hope you will continue to support our work in the months and years ahead.

Doug Bechtel
President

*Protecting New Hampshire's natural environment
for wildlife and for people.*

Cover Photo:

Rebecca Suomala photographed these shorebirds on migration, roosting during high tide in Hampton on August 19. The majority are Semipalmated Sandpipers, with a few Semipalmated Plovers, and two (larger) Whimbrels. Stopover sites are critical for resting and feeding during their fall migration to South America. NH Audubon is documenting shorebird concentration sites on the NH coast. This multi-year project is funded by The Fuller Foundation and the Blake-Nuttall Fund.

"When I took this photo, there were over 1,000 shorebirds concentrated here, including several Whimbrels, a species that I don't get to see very often now. They used to stop and feed during fall migration at the mussel beds in Hampton Harbor, but those beds are gone so the Whimbrels don't stop in the harbor anymore."

Highlights

This financial data is based on our most recently completed Fiscal Year, from April 1, 2018 through March 31, 2019:

Contributions ahead of prior year by \$10K.

Raised \$21,220 toward renovations for Ash Cottage in Hebron.

Received \$595K in bequest income.

Membership up by \$9K over prior year.

Reduced expenses by \$199K.

NH Audubon is grateful for the generosity of the following organizations who contributed \$500 or more during Fiscal Year 2019 in support of our programs:

105th Annual Gathering & Meeting

Celebrating
50 Years in Paradise
September 21, 2019

Held at Camp Pasquaney, Hebron

Each year, NH Audubon holds its Annual Meeting and Gathering to bring members together for a day of outings, awards and a celebration of nature world. This year, in recognition of the 50th anniversary of Paradise Point (NH Audubon's oldest Nature Center) in Hebron, the gathering will be held on Saturday, September 21 at Camp Pasquaney on the shores of Newfound Lake.

Get inspired by the Newfound Lake region's natural beauty on a morning field trip from 9:30-11:30. Then let the inspiration continue as we celebrate the work of NH Audubon and the winners of this year's conservation leadership awards.

Join friends old and new for an exciting day. We hope to see you there!

Field Trips

Hawk Watching on Little Round Top, Bristol

Leader: Phil Brown, Director of Land Management

Meet at Slim Baker Lodge and join Phil Brown for a short and easy hike (.2 mile) to Inspiration Point during the annual raptor migration. We'll be on the lookout for kettles of Broad-winged Hawks migrating south.

Ecology Cruise on Newfound Lake, Hebron

Leaders: Newfound Lake Region Association • Fee: \$15/person (limited to 10 participants)

Join NLRA's education staff at Grey Rocks Conservation Area for a boat cruise to explore the lake. You'll learn about the lake's history and what makes Newfound so unique while observing its spectacular wildlife from Common Loons to Bald Eagles.

50 Years in Paradise Nature Walk, Newfound Center

Leaders: Adam Blankenbicker, Center Director and Christian Robinson, Center Naturalist

Join the Newfound Center staff on a guided tour of Paradise Point Wildlife Sanctuary and explore the 43 acres and 3,500 feet of unspoiled shoreline of pristine Newfound Lake. Learn about the geology, history, and natural history of this special sanctuary.

Birding at Grey Rocks, Hebron

Leader: Dr. Pam Hunt, Senior Biologist, Avian Conservation

Join Pam Hunt for an early morning bird walk (beginning at 9am) and exploration of Grey Rocks Conservation Area and the Cocker mouth River. Level trails make this an easy walk for all abilities.

Keynote speaker Ben Kilham

The day will include a keynote address by Dr. Ben Kilham from the Kilham Bear Center in Lyme. Kilham is NH's only licensed bear rehabilitator, has authored two books on bear behavior, and is a world-renowned bear expert, even advising scientists in China and Russia on bear behavior.

Schedule for the Day

9:30-11:30am—Field Trips

12pm—Buffet Lunch

12:45pm—Awards

1:30pm—President's Address
and Business Meeting
(President's Award)

2pm—MOTUS Presentation

2:30pm—Keynote Address by
Ben Kilham

3:30pm—Adjourn

Cost: \$50/person. Registration includes lunch and full-day program (additional fees may be charged for some field trips).

Visit www.nhaudubon.org for more details and online registration links.

Registration deadline is September 13.

Thank you!

NIGHTHAWK CHICK LINGERS

There was one confirmed Common Nighthawk nest this season, and it was in Concord. It produced one chick which stayed at the nest site for more than 40 days. Chicks can fly at 19 days old. The parents continued to feed it but the chick also

spent more and more time flying and feeding itself. This is only the second time in Project Nighthawk history that a chick was observed at the nest site for more than 40 days. There is still so much we don't know about nighthawk chick survival and because it stayed around so long, this was a wonderfully unique opportunity for observation.

Photos of the chick at 12 days old (right) and 33 days old (left) by Rebecca Suomala, NH Audubon's Project Nighthawk Coordinator.

Holiday Wreaths

Handmade at Massabesic Center just for you!

Welcome family and friends this holiday season with a fragrant wreath.

Make it extra special with natural materials gathered from gardens, fields, and forests. Each is unique and decorated with care. (Note: this is the first modest price increase in three years due to increasing base prices for products.)

Thank you for supporting this fundraising event for nature education!

Sanctuary Snapshot

The newly-restored and renamed Jack Gleason Memorial Platform at the Ponemah Bog Wildlife Sanctuary in Amherst affords visitors a peaceful place from where to observe a kettlehole pond, unusual bog plants, and myriad wildlife including waterfowl, turtles, and dragonflies.

A field trip here on September 28 (see Calendar) will focus on both birds and bog plants. Photos by Phil Brown.
